1985 STATISTICAL INFORMATION FOR DISTILLED SPIRITS

The attached tables were prepared by the Distilled Spirits Council of the U.S. to provide statistical information about the liquor industry.

Apparent consumption of liquor fell to 416,117,000 gallons in 1985 (a decline of 2.4%), with apparent consumption of beer at 5,657,341,000 gallons and wine at 569,013,000 gallons.

Per capita consumption of liquor (based on resident population) was 1.74 gallons per person. Adult per capita consumption (based on population of 21 years and older) was 2.53 gallons per person.

Month-by-month reporting of apparent consumption of distilled spirits in 1985 indicates an increase in apparent consumption in the third quarter of 1985 over that same time period in 1984.

Total estimated distilled spirits entering U.S. trade channels dropped from 443,940,000 in 1984 to 430,671,000 in 1985. Whiskeys (total domestic and imported) experienced a sharp decline of about 6.9% in 1985, while cocktails and mixed drinks registered the largest percentage decrease in 1985 -- about 7%. Estimated distilled spirits entering U.S. trade channels increased in 1985 for brandy, cordials and specialties, and tequila. Cordials and specialties showed the largest percentage increase entering U.S. channels in 1985, gaining by about 10.4% over 1984.

Total dutiable imports declined by about 1.8% in 1985. Of total imports, whiskey accounts for about 68.2%, or 79,680,000 proof gallons.

We have improved our coverage of sales of distilled spirits by class and type with reporting by four additional states. Among the reporting states, total whiskey sales (domestic and imported) were highest in California in 1985, with sales high in Florida, New York and Texas as well.

STATISTICAL TABLES

Apparent Consumption of Distilled Spirits in the United States, License and Control States, 1934-1985

Apparent Consumption of Distilled Spirits, by State, Total and Per Capita, 1984 and 1985

Apparent Consumption of Distilled Spirits in the United States by Month, 1984 and 1985

Apparent Consumption of Distilled Spirits, Beer and Wine, by State, Total and Per Capita, 1985

Apparent Consumption of Alcohol from Distilled Spirits, Beer and Wine, by State, Total and Per Capita, 1985

Estimated Distilled Spirits Entering United States Channels, Including Bottled Exports, by Class and Type, 1975-1985

United States Dutiable Imports of Distilled Spirits for Consumption by Class, 1934-1985

Sales of Distilled Spirits: Retail Sales in Control States, Supplier Shipments in License States by Class and Type, 1985

Continued Sales of Distilled Spirits: Retail Sales in Control States, Supplier Shipments in License States by Class and Type, 1985

Apparent Consumption of Distilled Spirits in the United States
License and Control States, 1934–1985

NOTE: Because of rounding, detail may not add to total. Excludes Hawaii, 1934–1964.

[a]Includes District of Columbia.

[c]Includes Mississippi gallonage from July through December 1966.

[r]Revised.

Source: Distilled Spirits Council of the United States, Inc., Bureau of the Census, U.S. Department of Commerce.

Where available, license state consumption based on taxed gallonage reported by state tax authorities. In other states, estimated from state treasury tax collections by dividing revenues collected by tax rate per gallon. In Georgia, Missouri, South Carolina, and South Dakota, consumption represents sales by distillers to wholesalers and in Wisconsin sales by wholesalers to retailers. Hawaiian estimates are based on semiannual tax data, through 1983.

Control state consumption is actual retail sales in state liquor stores as reported to the National Alcohol Beverage Control Association, except in Mississippi and Wyoming where statistics represent wholesale sales by state liquor control boards to private retailers.

NOTE: Actual consumption takes place after tax collections and wholesale shipments are made. Also, stock changes at the retail level and in the home not included in the estimates.

Apparent Consumption of Distilled Spirits, by State, Total and Per Capita, 1984 and 1985

NOTE: Because of rounding, detail may not add to total. Percentages were calculated before rounding.

[a]License States: *Based on shipments from distillers to wholesalers.
**Based on shipments from wholesalers to retailers and other outlets.

Where available, license state consumption is based on taxed gallonage reported by state authorities. In other states, estimated from state treasury tax collections by dividing revenues collected by state tax rate per gallon. In Georgia, Hawaii, Missouri, South Carolina and South Dakota, consumption represents sales by distillers to wholesalers and in Wisconsin sales by wholesalers to retailers.

[b]Control States: All control state data except Mississippi and Wyoming are package sales in retail stores and case sales to on-premise licensees. Mississippi and Wyoming data represent wholesale sales from state-controlled warehouses to private retail establishments.

NOTE: Because of rounding, detail may not add to total. Includes some conversion from proof gallons to wine gallons.

[a]Revised.

[b]May include product to which 160 proof and over whiskey has been added as part of contents but does not enter trade channels at 160 proof.

[c]From 1965 to June 1975 bulk proof gallons reported by Census were converted at 82°; before 1965 at 86°; actual volume reported after June 1975.

[d]Includes whiskey from Northern Ireland.

[e]Vodka statistics in 1982 and 1983 were incorrectly reported. Certain proprietors of distilled spirits plants who provide BATF with monthly processing reports had been classifying vodka distilled in Puerto Rico as imports. BATF has provided the correct figures and appropriate adjustments are included.

NA-Data for calendar 1980 are not strictly comparable with 1981 and earlier year data because of reporting and definitional difficulties in the first nine months of 1980 that resulted from the change to the all-in-bond system by the U.S. Bureau of Alcohol, Tobacco, and Firearms. Also, for these reasons, a breakdown between domestic and imported non-whiskey spirits of 1980 is not reliable and therefore is not given.

NOTE: Because of rounding, detail may not add to total.

[a]Data for the years 1934 through 1978 are in tax gallons; data for 1979 through 1983 are in proof gallons.

[b]Indicates shipments in wood or metal containers each holding more than one gallon.

[c]Before 1980 vodka included in "Other."

[d]Before 1974 tequila included in "Other."

[e]Before 1979 bitters included in "Other."

[f]Substantial quantities of imported bulk rum were shifted from Customs bonded warehouses to BATF bonded warehouses in 1984 (about 5 million gallons from Jamaica). As a result, these supplies have been described as imports for immediate consumption, although bottling and consumption may not take place for a year or more. The shift occurred because, with passage of the Caribbean Economic Recovery Act in 1984, rum from Caribbean nations now enters the U.S. duty free, making storage in Customs bonded warehouses unnecessary to defer payment of import duties.
